Education

2020 – 2024
Asyut, Egypt
Bachelor of Computers and Information
Assiut University
Computer Science Department

Professional Experience

2025/02 – present
Coding Instructor
iSchool

- Teach Python programming to students aged 8 to 13.
- Simplify complex coding concepts into engaging lessons.
- Foster problem-solving and logical thinking skills through interactive exercises.

2025/01 – present
Coding Instructor
Future Kids Academy

- Teach kids (6-18) Python and Scratch in a fun and easy way.
- Develop interactive coding lessons to enhance problem-solving skills.
- Guide students in creating projects and games to reinforce learning.

2024/07 – present
AI Instructor
Ahmed Deifallah International School For Technology Applied

- Taught advanced concepts in artificial intelligence to students aged 17–19.
- Introduced students to emerging technologies such as AI, General AI, Hugging Face, Virtual Reality, and their integration with hardware systems.

2022 – 2024
Assiut, Egypt
Head of Machine Learning & Data Science Team
Google Developer Student Clubs - Assiut University
Led and conducted workshops on various topics, including:

- Basic Python
- Power BI
- Introduction to Machine Learning
- Real Estate Project Predictions

2023 – present
Assiut
AI Researcher
Assiut University Hospital

Part of a team seeking to develop a Deep Learning model that can classify and segment a tumor in diseases like brain tumor segmentation

2022 – 2023
Cairo
Data Analyst | Data Scientist Trainee
Instant

Projects

COVID-19 Data Analysis (SQL) [🔗](#)

- Analyzed COVID-19 data using SQL queries.
- Calculated death percentages and infection rates.
- Identified high infection rates by location and continent.
- Utilized SQL features such as CTEs and temporary tables for data manipulation.

- Developed views to facilitate future visualization.

Udemy Analysis [↗](#)

Using Python

- Conducted in-depth analysis of Udemy's dataset utilizing Python, including data cleaning, transformation, and application of statistical methods such as mean and standard deviation.
- Identified key insights regarding course popularity, student engagement, and preferences.
- Developed compelling data visualizations using Matplotlib, Plotly, and Seaborn.
- Demonstrated proficiency in deriving actionable insights from large datasets.
- Deepened understanding of the e-learning industry through analysis and exploration.

Movies Analysis

Using Power BI

- Analyzed IMDb's top 250 movies dataset using Power BI.
- Cleaned and preprocessed data, handling missing values and transformations.
- Established relationships among tables for effective data modeling.
- Designed interactive visualizations to identify trends.
- Developed an intuitive dashboard for clear data presentation.
- Documented analysis process for reproducibility.

Breast Cancer Detection [↗](#)

- Developed a machine learning model for breast cancer detection using Python.
- Preprocessed and cleaned the dataset, ensuring data quality.
- Implemented and trained various classification algorithms.
- Evaluated the model using appropriate evaluation metrics.
- Optimized the model for better accuracy and performance.
- Provided insights and recommendations based on the analysis to improve breast cancer detection and diagnosis

Skills

Proficient in programming languages such as
Java, Python, C++, Java script, C#, and MATLAB

Strong understanding of data structures and algorithms

Familiarity with database management systems, such as
MySQL and SQL

Data Visualization and Reporting
Power BI and Excel

Experience with software development methodologies, including Agile

Experience using Machine Learning and Deep Learning Tools and Algorithms

Soft Skills

Leadership, Communication Skills, problem-solving challenges in ICPC, Collaboration, Continuous Learning, Staying Current with evolving technologies, and working in a team environment
