Summary

AI & Software Engineer with a strong academic foundation in data structures, algorithms, and traditional machine learning. Proven hands-on experience developing scalable backends and intelligent solutions using FastAPI, RAG systems, and LLMs. Offers a versatile background in IT support and data analytics adaptable to diverse business scales, with an active commitment to learning and integrating Odoo ERP ecosystems to drive business automation

Professional Experience

2024/07 – 2025/06	AI Engineer <i>IATS</i> • Architected and delivered an advanced AI curriculum for pre-university students, focusing on traditional machine learning algorithms, database management, and practical model deployment. • Engineered hands-on labs and projects integrating Generative AI, RAG, and FastAPI to demonstrate scalable, real-world application development..
2025/02 – present	Demi Instructor <i>iSchool</i> • Teach Python programming to students aged 8 to 13. • Simplify complex coding concepts into engaging lessons. • Foster problem-solving and logical thinking skills through interactive exercises.
2025/01 – 2025/05	Coding Instructor <i>Future Kids Academy</i> • Teach kids (6-18) Python and Scratch in a fun and easy way. • Develop interactive coding lessons to enhance problem-solving skills. • Guide students in creating projects and games to reinforce learning.
2022 – 2024 Assiut, Egypt	Head of Machine Learning & Data Science Team <i>Google Developer Student Clubs - Assiut University</i> Led and conducted workshops on various topics, including: • Basic Python • Power BI • Introduction to Machine Learning • Real Estate Project Predictions
2023 – present Assiut	AI Researcher <i>Assiut University Hospital</i> Part of a team seeking to develop a Deep Learning model that can classify and segment a tumor in diseases like brain tumor segmentation
2022 – 2023 Cairo	Data Analyst Data Scientist Trainee <i>Instant</i> • Acquired hands-on experience in data manipulation and exploratory data analysis (EDA) using Python (Pandas, NumPy) and SQL. • Built data visualizations and dashboards to turn raw datasets into clear, actionable business insights.

- **Developed foundational machine learning models** for classification and regression tasks.

Projects

COVID-19 Data Analysis (SQL)

- Analyzed COVID-19 data using SQL queries.
- Calculated death percentages and infection rates.
- Identified high infection rates by location and continent.
- Utilized SQL features such as CTEs and temporary tables for data manipulation.
- Developed views to facilitate future visualization.

Udemy Analysis

Using Python

- Conducted in-depth analysis of Udemy's dataset utilizing Python, including data cleaning, transformation, and application of statistical methods such as mean and standard deviation.
- Identified key insights regarding course popularity, student engagement, and preferences.
- Developed compelling data visualizations using Matplotlib, Plotly, and Seaborn.
- Demonstrated proficiency in deriving actionable insights from large datasets.
- Deepened understanding of the e-learning industry through analysis and exploration.
-

Movies Analysis

Using Power BI

- Analyzed IMDb's top 250 movies dataset using Power BI.
- Cleaned and preprocessed data, handling missing values and transformations.
- Established relationships among tables for effective data modeling.
- Designed interactive visualizations to identify trends.
- Developed an intuitive dashboard for clear data presentation.
- Documented analysis process for reproducibility.

Breast Cancer Detection

- Developed a machine learning model for breast cancer detection using Python.
- Preprocessed and cleaned the dataset, ensuring data quality.
- Implemented and trained various classification algorithms.
- Evaluated the model using appropriate evaluation metrics.
- Optimized the model for better accuracy and performance.
- Provided insights and recommendations based on the analysis to improve breast cancer detection and diagnosis

Education

2020 – 2024

Asyut, Egypt

Bachelor of Computers and Information

Assiut University

Computer Science Department

Skills

Proficient in programming languages such as

Python, C++, JavaScript, HTML, CSS, MATLAB

Databases & Analytics

SQL, MySQL, MongoDB, Power BI, Excel

Soft Skills

Problem-Solving (ICPC), Leadership, Team Collaboration, Communication

AI & Machine Learning

Large Language Models (LLMs), RAG, Deep Learning, Traditional ML Algorithms, Data Structures & Algorithms

Frameworks & Tools

FastAPI, Git, Agile Methodologies
